

Test Summary

Tested By : Ashwini K S

Test date : 22 - 03 – 2025

Test Environment : Windows 11, Chrome 120, Iphone 15 Pro(Safari)

TEST RESULT REPORT

Application URL - <https://qa.busibud.com/test1/>

Test Case ID	Test Scenario	Expected Result	Actual Result	Status (Pass/Fail)	Comments
TC1	Login Page - Enter valid credentials	User should log in successfully	Login button not working	Fail	Known issue
TC2	Login Page - Enter invalid credentials	Error message should appear	Error message displayed correctly	Pass	-
TC3	Check responsiveness on mobile	Page should adjust properly	Works as expected	Fail	-
TC4	Password field masking	Password should be hidden	not working as expected	Fail	-
TC5	Check browser compatibility (Chrome, Firefox, Edge)	Page should work across browsers	Works fine in Chrome, issues in Safari	Partial Pass	need some correction for Safari

1. Usability Testing

1. Form Layout & Readability
- The input fields properly aligned.
 - Labels clear and easy to understand.

- There is enough spacing between elements.
- The placeholder texts present where needed in the application.

2. Navigation & Flow

- The page is easy to navigate.
- The page indicate which form the user is on Signup/Login.
- The buttons easily clickable and visible?

3. User Experience (UX) Enhancements

- Buttons visually respond but no hover effects or color change.
- The input fields easy to click and type into the fields.

2. Functional Testing

1. Input Fields

- users can type into all input fields.
- The password fields are not masked .
- The form structure look correct when filled.

2. Button Clicks (Even if no backend functionality exists)

- The "Signup" button respond when clicked.
- Not all buttons have hover effects or cursor changes.

3. Form Switching (If Available)

- There is no switching between Signup & Login exists.

3. Compatibility Testing

1. Cross-Browser Testing

Test the page in:

- Google Chrome - working properly
- Safari (Mac/iOS) - working properly

2. Cross-Device Testing

- Desktop (Full-screen & Resized Window) - works
- Tablet View (Chrome) - works
- Mobile View (Check touch responsiveness) - works

4. Security Testing (Basic Frontend Checks)

1. Check Password Input Security

- Passwords should not be visible when typed - Not working
- Ensure no password appears in plain text when copied - not working as expected

Bug Report Summary

Bug ID	Description	Severity (High/Medium /Low)	Status (Open/Fixed)	Assigned To
B1	Login button not working	High	Open	Developer
B2	UI misalignment on mobile	Medium	Open	UI
B3	Safari compatibility issue	Medium	Open	Developer

Security :

- Check for weak password acceptance is not working.
- Ensuring the password fields do not show in plain text when copied not working.
- Inspecting the browser console for exposed sensitive information.

Conclusion :

- critical issue : Login button bug, mobile responsiveness.
- Recommended fixes : Improve UI responsiveness, fix safari issue.

TEST RESULT REPORT

Application URL - <https://qa.busibud.com/test2/>

Test Case ID	Test Scenario	Expected Result	Actual Result	Status (Pass/Fail)	Comments
TC1	Check if form layout is proper	Fields should be aligned and readable	Aligned Properly	Pass	-
TC2	Check upload fields	Should allow file selection	Works as expected	Pass	-
TC3	Check "Next" button	Button should be clickable	Works as expected	Pass	-
TC4	Test responsiveness on tablet/mobile	Page should resize properly	Works as expected	Pass	-
TC5	Check browser compatibility	Page should load correctly on all browsers	Works as expected	Pass	-

1. Usability Testing

1. Form Layout & Readability:

- The input fields are properly aligned.
- The form visually clear and easy to understand.
- The labels/descriptions provided for the upload fields.

2. User Experience:

- The page guide users effectively?
- The buttons are easily clickable and visible.

2. Functional Testing (Limited due to HTML Template)

1. File Upload Fields:

- Users select files successfully.

- The fields allow selecting multiple files .
- There is no restrictions on file types/sizes?
- The form clearly display the selected file names.

2. Next Button:

- It visually respond when clicked and it will go to the thank you page.

3. Compatibility Testing

1. Cross-Browser Testing:

Test the page on:

- Google Chrome
- Safari (Mac/iOS)

2. Cross-Device Testing:

- Desktop (Full-screen & minimized window) - working
- Mobile (Check touch responsiveness) - working

4. Security Testing

1. File Upload Security Checks:

- Ensure the form does not expose any sensitive data - working

Conclusion :

- Fix mobile responsiveness issues - spacing.
- Make file upload fields accept only allowed formats - eg : pdf format only

TEST RESULT REPORT

Test Case ID	Test Scenario	Expected Result	Actual Result	Status (Pass/Fail)	Comments
TC1	Check if input fields accept text	Users should be able to type	Works as expected	Pass	-
TC2	Password field masking	Password should be hidden	Works correctly	Pass	-
TC3	Check if "Signup" button is clickable	Button should react on click	Works correctly	Pass	-
TC4	Check if "Login" button is clickable	Button should react on click	not working as expected	fail	-
	check if "Login here" button is clickable	Button should react on click	Works correctly	pass	
TC5	Test responsiveness on tablet/mobile	Page should adjust properly	works correctly	Pass	-
TC6	Browser compatibility test	Page should render correctly	Works correctly	Pass	-
TC7	Console Errors Check	No console errors should appear	No errors found	Pass	-

1. Usability Testing

1. Form Layout & Readability
 - The input fields properly aligned.
 - The labels are clear and easy to understand.
 - There is enough spacing between elements.
2. Navigation & Flow
 - The page easy to navigate.
 - The page indicate which form the user is on (Signup/Login).
 - The buttons easily clickable and visible.
3. User Experience (UX) Enhancements
 - The buttons visually respond but no hover effects or color change
 - The input fields are easy to click and type.

2. Functional Testing

1. Input Fields
 - Users can type into all input fields.
 - The password fields are masked .
 - The form structure look correct when filled.
2. Button Clicks - works
 - The "Signup" button respond when clicked - Works
 - The "Login" button visually react - Yes
 - The "Register" button appear to work - Yes
 - all buttons don't have hover effects or cursor changes.
3. Form Switching is available , switching between Signup & Login exists, it work properly.

3. Compatibility Testing

1. Cross-Browser Testing
 - Test the page in:
 - Google Chrome
 - Safari (Mac/iOS)
2. Cross-Device Testing
 - Desktop Full-screen & Resized Window - works
 - Mobile View Check touch responsiveness - works

4. Security Testing

1. Check Password Input Security
 - Passwords should not be visible when typed - It works
 - Ensure no password appears in plain text when copied.- not works

Conclusion

- Fix mobile responsiveness issues alignment & spacing.
- Ensure consistent rendering across all browsers.
- Add hover effects for better UX .
